Repair, even if you have used this product before. The information may have been amended according to new research and findings since you last used the product. Store the instructions for future reference.

# donttellmum®

## MEDICAL SKIN CARE

### Eczema Repair

**Suitable for adults, children and babies of 8 weeks and older**

donttellmum® Eczema Repair is available in a 20ml and 50 ml tube.

#### Indication for use

donttellmum® Eczema Repair is a topical cream indicated for mild to moderate atopic dermatitis (eczema). It hydrates, repairs, and protects damaged skin, providing relief from symptoms such as redness, itching, burning sensation, and dryness. By restoring the skin barrier, it also aids in the prevention of eczema flare-ups.

#### Eczema Repair is intended to:

1. Increase skin moisturization
2. Accelerate skin repair of injured/damaged skin
3. Support skin barrier function

#### Dosage and use

Clean and dry hands before and after applying the soft cream.

#### Treatment

Apply twice a day onto the affected area of the skin, and after bathing.

#### Prevention

Apply twice a day and after bathing onto dry, sensitive, or eczema-prone skin to help prevent eczema flare-ups.

## The promise of donttellmum® Eczema Repair: sustainable & effective

donttellmum® Eczema Repairs' mode of action is a result of the combination of its ingredients that were carefully selected based on their unique characteristics:

### 1 Oatmeal extract:

**To form a protective barrier**

donttellmum® Eczema Repair contains a special oatmeal extract that forms a protective barrier on the skin. This protective barrier prevents exposure of the damaged skin to external irritants that can trigger eczema flare-ups.

### 2 100% 'vegetable petrolatum'

**The sustainable choice for long-lasting effect**

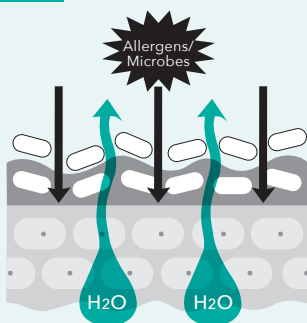

donttellmum® Eczema Repair is a cortisone free formulation with natural ingredients including a petrolatum alternative of 100% vegetable origin which covers the dry skin areas effectively resulting in rehydration and long lasting moisturization. This reduces dryness, redness and itching of the affected skin.

### 3 All three skin identical lipids in a multi-lamellar technology

**To accelerate skin repair**

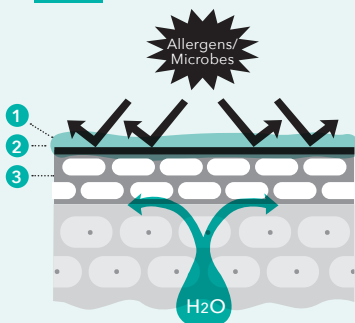

Most eczema creams use only one or two types of skin lipids. donttellmum® Eczema Repair contains all three types of skin lipids in a multi-lamellar technology necessary to resemble the natural structure of the outermost layer of the skin. This mixture of skin lipids accelerates skin repair and restores the natural skin barrier function. It reduces eczema related symptoms such as itching, redness and dryness of the skin.

**Before**

Damaged skin with a weakened skin barrier

**After**

Damaged skin became healthy after using Eczema Repair

## Why donttellmum®

You don't need to tell a mum how to treat her child, she knows best what her little one needs. However, when she's looking for relief, we are here!

### What is Atopic Dermatitis (eczema)?

Atopic Dermatitis - commonly known as eczema - is a common skin disorder that is characterized by an impaired skin barrier function and that is marked by symptoms such as redness, itching, burning sensation and dryness of the skin. In this chronic disease, the skin goes through cycles of inflammation and itch.

### What triggers eczema symptoms?

Eczema flare-ups can be triggered by environmental factors (i.e. sun, humidity and cold) and contact of the affected skin with external irritants (i.e. detergents, fabrics such as wool and bacteria). Break-outs are common in places where the skin is thin, and flexes often (inside of elbows and knees).

### Ingredients

Aqua, caprylic/capric triglyceride (14%), pentylene glycol, betaine, prunus amygdalis dulcis (sweet almond) oil, glycerin, colloidal oatmeal (2.5%), hydrogenated vegetable glycerides, hydrogenated rapeseed oil (2%), cera alba (yellow beeswax), butyrospermum parkii (shea) butter, hydrogenated lecithin, C12-16 alcohol, palmitic acid, panthenol (0.9%), parfum, xanthan gum, carbomer, squalane, sodium lauroyl lactylate, tromethamine, ceramides NP/AP/EOP (0.04%), phytosphingosine, cholesterol.

### Precautions for use

- For local external use on the skin only. Do not use in or near the eyes, mouth, or genital area.
- Do not use on open wounds.
- Do not use in case of known sensitivity to one of the ingredients.
- Suitable from 8 weeks of age with a body weight of more than 4 kg.
- Consult a physician when treating large areas or for an extended period of time.
- When pregnant or breastfeeding, only use under the supervision of a healthcare professional.
- When breastfeeding, do not expose the child to (adult) skin on which the product has been applied.
- It is recommended to pause usage for 3-5 days after 25 days of continuous use.
- Moderate to severe conditions are advised to be treated by a medical professional. In case specialized medical treatment is required or when used in combination with other products, only use under supervision of a physician.

### Possible side effects

An allergic reaction to any of the ingredients may occur in rare cases. Immediately stop treatment if you see any signs of irritation. If the problem persists, consult your health care practitioner.

If a serious incident has occurred in relation to the product, report to the manufacturer mentioned on the leaflet and the competent authority in your country.

#### Storage

Store at room temperature. Keep out of reach of children. Close the tube securely after use.

Keep tube away from sunlight.

#### Lot number and expiration date: see box & tube

When the treatment is complete dispose of the tube, leaflet and carton as with any common urban waste. Consider the environment and recycle.
